Dear IT Recruiter,

I am interested in starting my IT career and continuing my learning with you.

My name is Courtney Hagen and I am a recent graduate from the IT Systems Management and Security student at Nova Scotia Community College. I choose IT as a career because I have always loved learning and have no intent to stop when I leave college. IT is an industry where you must constantly learn and evolve as the technologies you manage do.

I completed my coursework with honors and the Co-Op designation and was the only one in my class with both accomplishments. I believe both are a reflection of my excellent work ethic and determination to excel. Above that, my Co-Op provided me with more experience in the industry compared to my colleagues.

For my Co-Op, I worked at GeoSpectrum Technologies Inc. as an IT intern. I was trusted with many major projects, such as decommissioning the main domain controller, helping with a hybrid deployment of Office 365, and setting up a certificate authority. I was one of an IT team of 2, and as such, I was exposed to an incredible amount of experiences that already give me a jump start in this industry.

I believe that my combination of unique experience, skills, and demonstrated dedication in learning would make me an ideal candidate for your company. I have attached my resume to provide more information of my skills and background.

I am looking forward to engaging with you and your company,

Courtney Hagen
